EDUCATION

University of Maryland

Bachelor of Science in Computer Science + Machine Learning

College Park, MD

May 2026

EXPERIENCE

Capital One

Jun 2025 – Aug 2025

Software Engineering Intern

Richmond, VA

- Developed and **productionized** a **zero-touch** pipeline using **AWS Lambda** and **Llama 4 Scout** to automate internal issue triaging; replaced a legacy SVM system and its 3-hour manual CSV workflow with a scheduled **Jira-to-Model retraining loop**, increasing bot utility from a 'file a ticket' prompt to active issue resolution.
- Developed a containerized Selenium module to programmatically execute data uploads via **AWS ECS Fargate** and **Docker**, diagnosing and resolving **10+ critical Docker runtime failures** related to memory constraints and architecture mismatches.
- Orchestrated secure authentication by integrating **AWS Secrets Manager** for service account credential rotation, ensuring SOC2-compliant access to internal admin interfaces.

Columbia University - CRIS Lab

Sep 2025 – Present

Undergraduate Research Assistant

New York City, NY

- Engineered an **online reinforcement learning** algorithm using the **Multi-Armed Bandit (RL)** approach for a **genetic algorithm framework**, dynamically balancing operator allocation to achieve a 27.3% improvement in success rate in ground-truth mechanism recovery.
- Co-authored and selected for an **oral presentation** at the **AIChE Annual Meeting (Second Author)** for engineering a **novel reinforcement learning framework** featuring a Page-Hinkley reset test and Jaccard-based diversity rewards.

University of Maryland - Precision Agriculture Lab

Dec 2023 – Present

Undergraduate Research Intern

College Park, MD

- Developed a multi-factor analytical framework that **integrates and processes a decade of geospatial and tabular data** (Sentinel-2, NASS) using **Google Earth Engine** and Python, showcasing proficiency in **large-scale data ingestion**.
- Co-authored "An Overview of Drones in Agriculture" (**Second Author**), survey paper for Machine Learning applications for drone-based precision agriculture.
- Currently under revision for the Journal of Applied Earth Observation and Geoinformation (**First Author**); novel satellite-imagery based framework for stress analysis in Maryland.

ZoomInfo

Jun 2024 – Aug 2024

Machine Learning Engineer Intern

Bethesda, MD

- Built a **scalable AutoML SDK** from scratch using Python (*scikit-learn*, *PyTorch*) that architected **batch data processing workflows** to automate model selection and evaluation across **high-volume datasets**.

PROJECTS

1st Place, \$10K Winner | Ironsite.ai (SPC W24) Spatial Intelligence Hackathon, UMD

Feb 2026

- Built a 3-stage ML pipeline (**YOLO11** → **SAM3** → **method-prompted Qwen3-VL-8B with 3-pass adversarial verification**) to automatically detect PPE non-compliance and proximity hazards from egocentric construction footage, mapping violations to OSHA standards with severity scoring; work **published** as an **arXiv preprint (First Author, endorsed by Dr. Ramani Duraiswami)**.
- Designed a persona-scaffolded adversarial chain-of-thought **VLM** protocol with structurally enforced pass independence, achieving a **12% precision improvement** over single-pass prompting on the development corpus.

TECHNICAL SKILLS

Languages: Python, Java, C, C++, JavaScript, Go, SQL, OCaml, Ruby

Cloud/Infrastructure: AWS (ECS Fargate, Lambda, ALB, SNS), Docker, Linux, HPC, Git

Backend/Data: Flask, Batch/Stream Processing, Large-Scale Data Analysis, ETL Pipelines

AI/ML Tools: PyTorch, TensorFlow, scikit-learn, AutoML, MLOps, Pandas, NumPy, pytest
